

DS 203 – Big Data Essentials

Advanced SQL - PL/pgSQL Practice II

Overview

This handout is designed to familiarize students with PL/pgSQL through a series of guided tutorials available on the Neon Inc. website. By following this handout, students will have a foundational understanding of basic features of PL/pgSQL.

Tasks to Perform:

We will use the following tutorial to go through and practice the PL/pgSQL. The following tutorial will allow you to learn practical concepts and implement PL/pgSQL programs in your PostgreSQL database.

For today's session, you are supposed to follow the steps below to practice and learn Control Structures and User-Defined Functions in PL/pgSQL:

1. Navigate to the link: <https://neon.com/postgresql/postgresql-plpgsql>
2. Follow through and practice **Section 4: Control Structures**
3. Follow through and practice **Section 5: User-Defined Functions**

Inform the instructor about your progress at the end of the session. Practice all codes, execute them, evaluate the output, and make sure you understand them. If you struggle with understanding, please approach the instructor.
